

# Your visit to the Randall Museum

Are you excited?

---

Do you know what you'll be learning about?

---

Here are a few questions to get you started thinking.

## Electricity and Electromagnetism

1. Have you used electricity today?

---

---

2. Electricity seems like magic. It causes something to happen by invisible means - flipping a switch and a light goes on-. What is electricity?

---

3. What happens when you scuff your feet along a carpeted floor?

---

4. Energy is made up of atoms jiggling around. What is an atom made of?

---

5. Opposites attract. Negative and positive charges are drawn to each other. What about negative to negative or positive to positive charges. Do they attract?

---

---

If you don't know the answers to these questions- not to worry. We'll help you when you visit The Randall.

What's my goal for this field trip? (Having fun, for sure!)
