

# Spider Anatomy

Study this drawing of a typical spider. Notice all the parts that make up the spider. There are many different kinds of spiders but they all have similar body parts. On the following page write the names of the parts where indicated.

## FUN FACT

Most spiders have eight eyes. Some species have six or fewer eyes, but they always come in an even number.

# Spider Anatomy

Write the names of the spider's body parts on the lines below.

## FUN FACT

A strand of spider silk wrapped around the world would only weigh just over one pound!
